EVERY DAY FRESH

Delta Pride™ is the freshest name in fish! From the earliest stages, Delta Pride catfish are held to the strictest standards for quality.

Grow / Feed

Our fish are raised in above-ground ponds filled with pure water from deep aquifers. They're fed a scientifically formulated diet of soybeans, corn, wheat and essential vitamins and minerals.

Total Quality

At Delta Pride™ our fish are quality and flavor checked 3-4 times before the pond is harvested and once again just before the fish enter the processing plant. We pay attention to detail.

Harvest

Once a pond passes our extensive tests, the fish are trucked in water filled tanks aerated with oxygen to our processing plant.

Delta Pride has full-time USDA inspectors, so our customers can be assured they're getting the highest quality catfish on the market.

After processing, our fish are immediately flash frozen or ice packed, then shipped in freezer or refrigerated trucks for delivery to food service and retail customers nationwide. Delta Pride is the freshest name in fish. Every Day Fresh!
